

Everyone:

The RaPower3 Renewable Energy Program allows 'Average Joes' like you and I to qualify for a federally approved 1603 tax credit & incentive program. M&C's two year story follows: M is an experienced teacher and coach in the upper Midwest and his wife, C, is an experienced nurse. Combined they are making better than average income, but they are by no means "rich."

Both were very leery of the program the first year (2009) I talked to them about it, took a wait and see attitude, and sat out a year to 'see' results from other's participation. In 2010, they purchased the right number of RaPower3 Renewable Energy Systems to zero out all but \$700 of their tax liability

From M&C, April 2011:

"Greg & Roger:

My wife and I were a little skeptical about having H&R Block do our taxes this year (2010 tax year) but with both your and Roger's help, we are receiving a federal refund of \$18,016.00.

With the depreciation on our solar towers, it lowered our taxable income by \$32,751.00. Therefore, we are receiving an additional \$1,547 from the state. The grand total for 2010 is: \$19,563.00!!!!

I was told by our tax preparer that we used all of our tax credits this year so there is no "carry over" for next year. The one question I have is can we purchase more solar towers?"

Of course we said yes. In fact, Dr. Shepard and Neldon Johnson, CEO of IAUS, devised a five year carry forward program which M&C fully participated in this year and just wrote us after figuring their 2012 taxes:

"Greg & Roger:

First of all I want to thank you all for introducing this program to all of us who normally won't be able to afford the opportunity or benefit from this program. I fully understand how the MAJOR companies of the world can

ANDERSON_MATT000381

invest or participate in this type of program and do well for themselves. Now all of us "working stiff" can benefit just like the "Big Dogs". What really convinced me to partake in this endeavor was the character and integrity of you gentlemen. What can I say but "I'm a believer now"! Last year (Our first year of participating) my wife and I recovered almost all of our 2010 federal taxes and combined with our state taxes, we received a total back of over \$19,000! This year, because of the 100% depreciation on our units, we went back to 2009 and combined with that small amount from 2010 and all of 2011, we will receive a combined total of \$41,567.00!!!!!! Wow!!! I can't thank you enough for being involved with this great group of individuals! My family and I are very humbled by all of this and want you and everyone at RaPower3 to know how grateful we are for this opportunity. I can't wait to thank you in person at the convention in late June. See you then! M & C"

That's a three year combined state and federal tax return total of \$61,130. What M&C failed to mention in the above letters is that the equipment purchased will pay them back \$300,000+ over the next 35 years, AND that the RaPower3 Bonuses they have qualified for amount to \$522,000; AND that due to following the program properly, they quite possibly (depending on their income) be 'tax free' Thru 2016.

The reason for this letter is that this program is still up and running and will continue to run according to H.R. 1424 through 2016. We are enrolling people everyday. You can achieve the same or better results adjusted according to your income. If you would like to "preview" how the program would work for you and your family situation, please, give me a call. I will go over it with you. But first, be sure to go to www.RaPower3.com, study through the links and information there, write down your questions, and then call me.

WE'RE GOING GREEN!
