SUCCESS STORIES

TAX TIME SUCCESS STORIES

Greg,

I just want to drop a quick note to you to let you know that I too used TurboTax to prepare my tax returns. Thanks to the info you shared with us I did not have any problems filing my tax returns. I received word yesterday that my federal return had been accepted and in a few days I'm expecting to get my refund of over \$4K; also, I had over \$3500 carryover. I plan to amend my 2005 tax return and get that \$3500+ back as well. Again, thanks for all the information you shared with us--it made my job much easier. T.B.

Greg,

Finished my return for \$7,210 federal and \$560 state. WOW!! Thanks to Greg for the additional help, I used TurboTax check system about 20 times to be sure. Waiting on acceptance of the returns. Thanks Guys!! Bob D.

TO ALL: Bill D. from Tennessee reports the following success: "I bought ten systems last November and my CPA just informed me that I'm getting back over \$14,000 from my federal returns."

Jesse P., Principal from a mid-size high school in the Northwest, just got an IRS return of \$17,000. That's \$8,000 more than he got last year. He is very excited and is telling all his friends. Looks like we'll have a bunch of new members pretty soon.

An administrator here in the Portland was able to lower his tax rate from 25% to 17% as well as generate a \$19,000 refund. Also, Mike (teacher/coach) and his wife Jen (Administrator) will generate a return of near \$17,000 for this year. Both these cases are significant because all three work in school districts that have cut their contracts 10% for this year and an even greater cut is in store for next year, so the RaPower3 Program is bridging the gap. RF

Just a note regarding my tax return. I purchased 6 systems in October, 2010. Before applying my Rapower3 tax credits and depreciation, I owed \$7887. After applying Rapower3 to the equation, I am getting back \$1808 to be delivered around March 11th. That's 1.5 more than what I paid for my systems. Thanks Greg and all at Rapower3. I will be purchasing more systems soon. Lindy W.

Andrea purchased just two systems for \$2,100 last December and had \$3,500 wired into her account from the IRS and state by March 11th.

JF purchased 14 systems at a cost of \$14,700. He paid \$16,784 in federal taxes and will get back all of that back. Plus, he will amend his 2005 taxes and get back another \$9,500+. So his \$14,700 turned into over \$26,000 in just a few months. Not bad.

Greg,

Thanks again for your help and support. Mike and I are receiving \$17,500 from fed and \$5,200 from state. Just amazing. Roger is going to help me through the 1040x to claim credits and previous taxes. We are thrilled. Jen

Dear Greg,

My wife and I were a little skeptical about having H&R Block do our taxes this year but with both yours and Roger's help, we are receiving a federal refund of \$18,016.00. With the depreciation on our solar towers, it lowered our taxable income by \$32,751.00. Therefore, we are receiving an additional \$1,547 from the state. The grand total is: \$19,563.00!!!!

Thanks for all the help! Mark S.

BIGGEST MONTH EVER

December of 2010 was the biggest month ever at RaPower3. Our team members sold well over 2,000 systems. Congratulations!

RAPOWER3 TEAM MEMBER GETS AUDITED BY IRS

One of our RaPower3 Team Members was audited on a big amount.

Our RaPower3 member paid his taxes, but then protested. The IRS went to iaus.com and saw the video clip of the lenses burning wood and changed their mind. They allowed both the tax credit and the depreciation.

Our RaPower3 Team member received a check from the IRS for \$66,136 which included \$3,975 in interest.
