Solar Panels

Solar Panels- IAUS's panel fabrication is a unique, patented, molding process never-before done with a radial Fresnel lens. This process allows for inexpensive, high-volume, mass production that can be expanded for ultra-high volumes in a comparatively short amount of time.

These thin solar panels focus the sun's energy to a small, high-temperature point. The energy generated can be used for both electricity production and thermal heat for manufacturing, water purification, chemical refinement, and other heat-based processes.
